

FURTHER

Your Global Link to IGP for an equitable global healthcare benefit

Why partner with FURTHER?

FURTHER removes barriers to accessing treatment for employees and their families

FURTHER's health insurance and service solutions break down financial and geographic barriers to international medical treatment and expertise for serious illnesses and complex conditions, simplifying access during a time of stress and uncertainty. Employees have access to the best out-of-country hospitals and specialist treatments if diagnosed with a covered serious medical condition. FURTHER has designed the solutions around the entire patient journey, making all the arrangements and paying all costs up-front ensuring a seamless end-to-end experience, service and support.

Core solutions

- **Critical Advantage®**

The concept is simple but sits at the forefront of innovative insurance solutions. If an employee has a covered condition or requires one of the covered treatments, they can choose to receive that treatment at a medical center of excellence outside of their home country. Treatment, travel, and accommodation are all covered with a total policy limit of up to €2,000,000, and all arrangements are handled by FURTHER. There are no deductibles or upfront payments.

From start to finish, FURTHER ensures a seamless experience with 1:1 support and navigation, allowing your employees to focus on their health and recovery.

Critical Advantage typically covers:

- Cancer treatment
- Neurosurgery
- Coronary artery by-pass surgery
- Heart valve replacement and repair
- Live organ donor and tissue transplant

- **Precision CancerCare™**

An employee benefit at the spearhead of medical advances in cancer treatment, Precision CancerCare uses precision medicine molecular profiling testing to better diagnose cancer and recommend a treatment plan that is personalized to each individual tumor, based on the patient's genomic make-up.

The results are translated by an Expert Medical Board, made up of leading geneticists and oncologists, into a personalized (targeted) treatment plan, with specific treatment recommendations compatible with the unique genetic profile of each individual.

Where the molecular profiling analysis detects a heredity mutation which can be passed on to family members, direct family members will also be tested, and, if positive, a session can be arranged with a genetic counsellor.

Through FURTHER's Precision CancerCare+™ solution, if the best recommended treatment is not available locally, or the patient wishes to seek treatment in a center of excellence abroad, FURTHER will arrange end-to-end treatment overseas in world-leading cancer facilities and will take care of all travel arrangements and costs.

- **Virtual Care platform, powered by Trusteddoctor**

In 2021, Trusteddoctor became a part of the FURTHER GROUP, adding a powerful digital component to its offering.

FURTHER's Virtual Care Platform enables specialist doctors around the world to connect with patients through an award-winning online platform for virtual consultations and second medical opinions. This is an end-to-end service for faster, more efficient navigation of serious illness and complex cases and allows for the secure transfer of medical records in a curated format, together with interactive tools for effective collaboration.

An affordable way to invest in employees

FURTHER's employee benefits solutions provides employers with a highly affordable way to invest in their employees with the provision of choice and access to excellence in healthcare, which can play a key role in attracting and retaining the best talent.

FURTHER solutions are available directly: employers engage with just one provider who brings centralized reporting, administration, and management, taking away the heavy lifting.

Crucially, FURTHER offers a uniform solution that can be easily deployed across a local or multimarket workforce giving employees equal access to the same benefits. The ability to deliver equitable health benefits to employees aligned to Diversity, Equity & Inclusion ambitions, enables employers to be responsible corporate citizens, elevating their brand and reputation.
